

# **Faculty of Science & Technology Savitribai Phule Pune University, Pune**

## **Syllabus for FY M. SC. (Computer Applications) (2023 Pattern) (With effect from A. Y. 2023-24)**

## Preamble

The field of computing is rapidly changing, especially, since the last decade with continuous emergence of new disruptive technologies such as artificial intelligence, data science, cyber security, Internet of things, robotics and so on.

21<sup>st</sup> Century has witnessed rapid technological developments in every sector including the field of Computing. Moreover, it has created new job roles and massive job opportunities for budding graduates.

Premium Institutes, public and private Universities, autonomous and affiliated colleges in India have always played a crucial role in producing human resources with required skill sets by capturing and monitoring these developments and offered various UG and PG programmes.

The Savitribai Phule Pune University, Pune has made its significant contribution by offering degree programmes as per the trends from time to time. In the year 1989, it started offering a degree programme Bachelor of Computer Science (BCS), now called B. Sc. (Computer Science) and was its unique offering in the state of Maharashtra. Later the University offered undergraduate and graduate programmes such as Master of Computer Management (MCM), Bachelor of Computer Applications (BCA), Master of Computer Applications (MCA), M. Sc (Computer Science), M. Sc. (Computer Applications) etc.

The Savitribai Phule Pune University, Pune has taken a leading role in design and implementation of Programmes as per the guidelines and recommendations of National Education Policy (NEP) 2020. The university decided to offer UG and PG programmes with features recommended by NEP-2020 such as Multiple-entry/exit, inter and multi-disciplinary education, focus on skilling, on-job training/field projects, research, incorporation of Indian Knowledge System etc for the holistic development of students.

The university has adopted the guidelines provided by the state Sukanu Samittee and prepared the credit structure for PG programmes vide its circular No. 122/23.

The Ad-hoc Board of Studies in Computer Applications has prepared a structure for M. Sc. (Computer Applications) with following features

- The structure of the course is designed as per National Education Policy (NEP) 2020 and is in line with University circular 122/23.
- The total credits offered for the two years (level 6.0 and level 6.5) with four semesters are 88 with 22 credits assigned for each of the four semesters.
- The programme has Multiple Entry/exit feature.  
Various types of courses includes - Mandatory Core (MC) – Theory and Lab courses, Mandatory Elective (ME) – Theory and Lab courses, Research Methodology, On-job Training (OJT)/Field Project (FP) and Research Project (RP)

I am thankful to Hon. Vice-Chancellor Prof. Dr. S W. Gosavi, Hon. Dean of FoS&T, Prof. Dr. M G Chaskar for their guidance. I am thankful to all board members Prof. Dr. Rahul Patil, Prof. Dr. Razak Sayyad, Mr. Atul Kahate and Mr. Milnd Tanksale for their valuable inputs as well as the teachers from affiliated colleges for their active participation in preparing the draft syllabus.

**Prof. Dr. S S Sane**

**Chairman,**

**Ad-hoc Board of Studies in Computer Applications**

**Faculty of Science and Technology, SPPU**

## **M.Sc. (Computer Applications)**

### **Objectives**

The objective of the Program is to produce trained software professionals with hands-on experience on state-of-the art technologies who will be able to handle challenges in IT industry. The objectives of M.Sc. (Computer Applications) program are: -

- To produce knowledgeable and skilled human resources that is employable in IT and ITES.
- To impart knowledge required for planning, designing and building Complex Application Software Systems as well as to provide support for automated systems or applications.

M.Sc. (Computer Applications) Program is of Two Years duration with four semesters. It is a Full- Time post graduate Degree Program. The program is based on credit system comprising of total 88 credit points.

It is believed that the proposed syllabus as part of the credit-based system will bring a qualitative change in the way M.Sc. (Computer Applications) is taught, which will offer a more enriched learning experience. It aims to provide students with the knowledge and ability to develop creative solutions, and better understand the effects of future developments of computer applications, systems and technology on people and society. The students shall develop self and life-long learning skills.

### **Eligibility**

- (a) Bachelor Degree in Science/Technology/Engineering OR
- (b) Bachelor of Computer Applications (B.C.A.) OR
- (c) B.Sc.(Computer Science) OR
- (d) Bachelor of Computer Science (B.C.S.) OR
- (e) B.Sc.(Information Technology) OR
- (f) B.Sc.(Data Science) OR
- (g) B.Sc.(Cyber and Digital Science) OR
- (h) B.Sc. (Cyber Security) OR
- (i) B.Sc. (Cloud Computing) OR
- (j) Bachelor of Engineering(BE/B.Tech) in Computer Engg/Computer Science & Engg./ Computer Science and Design/ Information Technology/Electronics and Telecommunication/AI and Data Science/AI and Machine Learning/ equivalent OR
- (k) B. Voc. in Software Development/ Information Technology OR
- (l) B.Sc. with Computer Science as Principal Subject OR
- (m) General B.Sc. with Computer Science as one of the subject at TYBSc level Programme

### **Programme Outcomes:**

After successful completion of the Programme, the students shall be able to

**PO 1:** Demonstrate understanding of fundamental and advance concepts in emerging areas

**PO 2:** Design and develop innovative computer applications.

**PO 3:** Analyze existing research reported in the literature

**PO 4:** Propose alternate solutions by undertaking research work.

**PO 5:** Create efficient, reliable, readable and maintainable code.

**PO 6:** Demonstrate a deeper understanding of the chosen domain.

**PO 7:** Select appropriate method to solve the given problem

**PO 8:** Explain complex technical concepts clearly and effectively, both in written and oral forms.

**PO 9:** Demonstrate ability to collaborate effectively with team members, understand different perspectives, and contribute productively to become successful professional.

**PO 10:** Demonstrate ability to work with integrity and a sense of social responsibility.

**PO 11:** Demonstrate self and life-long learning skills

**PO 12:** Solve computational problems innovatively

**PO 13:** Apply knowledge gained and critical thinking to develop real-world applications.

---

## STRUCTURE FOR M. Sc. (Computer Applications) 2023 Pattern AS PER NEP GUIDELINES

### Abbreviations

TH: Theory  
CE: Continuous Evaluation  
CA: Computer Applications  
ME: Mandatory Elective  
OJT/FP: On-job Training / Field Project

PR: Practical  
EE: End Semester Examination  
MC: Mandatory Core  
RM: Research Methodology  
RP: Research Project

### SEMESTER I

Level	Course Type	Course Code	Course Name	Teaching Scheme		Exam Scheme			Credits		
				TH	PR	CE	EE	Total	TH	PR	Total
6.0	MC	CA 501 MJ	Database Systems and SQL	04	--	30	70	100	04	--	04

# SEMESTER I

<b>Savitribai Phule Pune University</b> <b>First Year of Master of Computer Applications (2023 Course)</b> <b>CA 501 MJ: Database Systems and SQL</b>		
<b>Teaching Scheme:</b> <b>Theory: 04</b> <b>Hours/Week</b>	<b>Credits:</b> <b>04</b>	<b>Examination Scheme:</b> <b>Continuous</b> <b>Evaluation: 30 Marks</b> <b>End-Semester : 70 Marks</b>
<b>Course Objectives:</b> <ul style="list-style-type: none"> <li>• To be familiar with database management system</li> <li>• To get acquainted with SQL and PL/SQL</li> <li>• To understand advanced SQL features and procedural SQL</li> <li>• To know the concept of triggers and assertions</li> </ul>		
<b>Course Outcomes:</b> On completion of the course, student will be able to– <ul style="list-style-type: none"> <li>• Enumerate database applications</li> <li>• Design E-R Model for given requirements and convert the same into database tables.</li> <li>• Apply Normalization techniques for database design</li> <li>• Formulate database queries using SQL</li> <li>• Write Embedded and dynamic queries using SQL/PLSQL</li> </ul>		
<b>Course Contents</b>		
Unit I	Introduction of DBMS	10 Hrs
<b>Introduction of DBMS</b> <ul style="list-style-type: none"> <li>• DBMS Overview</li> <li>• Advantages of DBMS</li> <li>• Users of DBMS</li> <li>• Applications of DBMS</li> <li>• Data models - (Hierarchical, Network, ER, Relational),</li> <li>• File system Vs. DBMS</li> <li>• Data independence</li> <li>• Levels of abstraction</li> <li>• Architecture of DBMS</li> <li>• Database Languages (DDL, DML, DCL)</li> </ul>		
Unit II	Conceptual Design (E-R model)	14 Hrs
<ul style="list-style-type: none"> <li>• Overview of DB design</li> <li>• Entity Types, Entity Sets,</li> <li>• Attributes, Attribute Types</li> <li>• Relationship Types, Relationship Sets, Relationship Degree</li> <li>• ER Diagrams, Naming Conventions (Attribute, Entity, Relationship), and Design Issues;</li> <li>• ER-to-Relational Mapping,</li> <li>• Schema Diagrams</li> <li>• Characteristics of Specialization and Generalization</li> <li>• keys, Constraints (Primary key, Foreign key, Check. Unique key, Not Null, Default etc)</li> </ul>		
Unit III	Relational Database Management Systems (RDBMS)	08 Hrs

<ul style="list-style-type: none"> <li>● Introduction to Relational Database, Relational Database Design,DBMS vs RDBMS</li> <li>● Functional Dependencies (Full functional dependency Partial functional dependency, Transitive functional dependency),Closure of set of Functional Dependency, Closure of set of attributes</li> <li>● Decomposition,Properties of Relational Decomposition (Attribute Preservation, Dependency Preservation, Lossless join, No redundancy Non Additive Join Property.)</li> <li>● Normalization, Need of Normalization, Normal form (1 NF,2NF,3NF,BCNF),</li> <li>● Case Studies</li> </ul>		
Unit IV	Introduction to SQL	08 Hrs
<ul style="list-style-type: none"> <li>● Introduction to SQL</li> <li>● Data Types in SQL</li> <li>● DDL commands (create, alter.drop,rename,desc) with examples</li> <li>● DML command(insert,delete,update,select)</li> <li>● DCL command(commit,rollback,grant,revoke)</li> <li>● Basic structure of SQL SELECT query( <i>Using BETWEEN, IN, OR,Like ,ORDER BY, GROUP BY and HAVING Clause,Distinct</i> )</li> <li>● Aggregate functions,</li> <li>● Set operations</li> </ul>		
Unit V	Intermediate SQL	10 Hrs
<ul style="list-style-type: none"> <li>● Nested ,Sub-queries,( <i>Using All,ANY</i>),</li> <li>● Joins and their type</li> <li>● Grouping and summarizing information– A very common error with GROUP BY– The HAVING clause</li> <li>● Writing queries on more than one table/multiple table -JOIN– Avoiding ambiguously named columns– Outer JOINS( LEFT OUTER JOIN, RIGHT OUTER JOIN, FULL OUTER JOIN)– Using table aliases– SELF JOINS</li> <li>● Overview of indexes,views,sequences</li> <li>● Optimizing Queries with Indexes and views</li> </ul>		
Unit VI	PL/SQL, Embedded and Dynamic SQL	10 Hrs
<ul style="list-style-type: none"> <li>● PL/PostgreSQL : Features,Advantages,Language structure,statements and Expressions</li> <li>● Control flow, conditional statements, loops</li> <li>● Cursors(Cursor attribute,Types-Implicit,explicit ,parameterized cursor,nesting of cursor)</li> <li>● Stored procedure(creation,procedure call,implementation)</li> <li>● Functions(creating ,calling function,passing parameters,returning a value)</li> <li>● Handling errors and exceptions</li> <li>● Triggers and Assertions</li> </ul>

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 502 MJ: Python Programming and Data Structures**

<b>Teaching Scheme:</b> <b>Theory: 04 Hours/Week</b>	<b>Credits</b> <b>04</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 30 Marks</b> <b>End-Semester : 70 Marks</b>
---	-----------------------------	--

**Course Objectives:**

- To introduce programming concepts using python
- Student should be able to develop Programming logic using python
- To develop basic concepts and terminology of python programming
- To test and execute python programs
- To be familiar with the concept of Data Structure.
- To learn the systematic way of solving problem
- To understand the different methods of organizing large amount of data
- To efficiently implement the different data structures
- To efficiently implement solutions for specific problems

**Course Outcomes:**

On completion of the course, student will be able to –

- Develop logic for problem solving
- Determine the methods to create and develop Python programs by utilizing the data structures like lists, dictionaries, tuples and sets.
- To be familiar about the basic constructs of programming such as data, operations, conditions, loops, functions etc.
- To write python programs and develop a small application project
- Design and implement Data structures and related algorithms
- Understand several ways of solving the same problem.
- To use well-organized data structures in solving various problems.
- To differentiate the usage of various structures in problem solution.
- Implementing algorithms to solve problems using appropriate data structures.

**Course Contents**

<b>Unit I</b>	<b>Basics of Python Programming</b>	<b>08 Hrs</b>
1.1 Introduction to python 1.2 Features of Python, 1.3 Identifiers, Reserved Keywords, Variables, Comments, Indentation in Python, Multiline Statements 1.4 Input, Output and Import Functions 1.5 Operators (Arithmetic, Comparison, Assignment, Bitwise, Logical, Membership, Identity), operator precedence 1.6 Data Types and Flow Control (Numbers, Strings, List, Tuple, Set, Dictionary , Data type conversion , Decision Making (if, for, while, nested loops, control statements, types of loops)) 1.7 Python tuples and sets Operations on tuples – Concept, operations and built-in functions. Sets - Concept, operations and built-in functions. 1.8 Python Dictionary(Concept (mutable),Creating and accessing values in a dictionary, Updating dictionary, delete dictionary elements, Properties of dictionary keys, built-in dictionary functions and methods		
<b>Unit II</b>	<b>Python Lists and Python Arrays</b>	<b>06 Hrs</b>
	2.1 Python Lists - concept, creating and accessing elements, updating & deleting lists, basic list operations, reverse, Indexing, slicing, built-in List functions, Functional programming tools - filter(), map(), and reduce()	

	,Using Lists as stacks and Queues, List comprehensions 2.2 Python Array - Concept of array- Array Representation, creating python array , accessing array elements. 2.3 Types of Arrays – One , Two and Multidimensional array. 2.4 Array Operations- Traverse, Insertion, deletion, search and update 2.5 array slicing, python list vs array	
<b>Unit III</b>	<b>Functions and Object oriented concepts</b>	<b>06 Hrs</b>
	3.1 Functions: Definitions and Uses, Function Calls, Parameters and Arguments, Variables and Parameters, Void Functions, Anonymous, Recursion, Lambda function Functional programming tools - filter(), map(), and reduce() 3.2 Python Classes / Objects Object oriented programming and classes in Python - creating classes, instance objects, accessing members ,Data hiding (the double underscore prefix) ,Built-in class attributes ,Recursive calls to methods ,Class variables, class methods, and static methods	
<b>Unit IV</b>	<b>Introduction to Data Structure, Sorting and Searching</b>	<b>04 Hrs</b>
	4.1 Concept , Need of Data Structure , Types of Data Structure 4.2. Algorithm analysis : definition, characteristics , Space complexity, time complexity 4.3 Asymptotic notation (Big O(Oh), Omega $\Omega$ ) 4.4 Sorting algorithms with efficiency - Bubble sort, Insertion sort, Merge sort, Quick Sort 4.5 Searching techniques –Linear Search, Binary search	
<b>Unit V</b>	<b>Stacks and Queues</b>	<b>12 Hrs</b>
	<b>Stack :</b> 5.1 Introduction 5.2 Representation- Using Arrays 5.3 Operations – init(), push(), pop(), isEmpty(), isFull(). 5.4 Application - infix to postfix, infix to prefix, postfix evaluation, 5.5 Simulating recursion using stack <b>Queue :</b> 5.6 Introduction 5.7 Representation - - Using Arrays 5.8 Operations - init(), enqueue(), dequeue(), isEmpty(), isFull() 5.9 Types of Queue - Linear Queue, Circular Queue, Priority Queue, 5.10 Concept of doubly ended queue	
<b>Unit VI</b>	<b>Linked List</b>	<b>09 Hrs</b>
	6.1 Introduction to Linked List 6.2 Implementation of Linked List – Static & Dynamic representation, 6.3 Types of Linked List – Singly, Doubly, Circular 6.4 Operations on Linked List - create, display, insert, delete, reverse, search, sort, concatenate & merge 6.5 Representing stacks and queues using linked lists	
<b>Unit VII</b>	<b>Trees</b>	<b>09 Hrs</b>
	7.1 Concept & Terminologies 7.2 Types - Binary tree, binary search tree , expression tree 7.3 Representation – Static and Dynamic 7.4 Operations on BST – create, Insert, delete, search , traversals (preorder, inorder, postorder), counting leaf, non-leaf & total nodes , non recursive inorder traversal	
<b>Unit VIII</b>	<b>Graph</b>	<b>06 Hrs</b>

8.1 Concept & terminologies

8.2 Graph Representation – Adjacency matrix, adjacency list, inverse Adjacency list, adjacency multi list,

8.3 Graph Traversals – Breadth First Search and Depth First Search

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 503 MJ - Operating Systems**

**Teaching Scheme:**  
**Theory: 02 Hours/Week**

**Credits**  
**02**

**Examination Scheme:**  
**Continuous Evaluation: 15 Marks**  
**End-Semester : 35 Marks**

**Course Objectives:**

- To Understand the basic concepts of operating system.
- To study Architecture, File systems and basic operating system commands.
- To understand Processes, Threads and Deadlocks
- To analyze memory management schemes.
- To understand I/O management and File systems.

**Course Outcomes:**

On completion of the course, student will be able to–

- Explain basic concepts of operating system
- Describe algorithms for process, memory and disk scheduling
- Apply technique for inter-process communication and Multithreading.
- Implement concept of critical-section
- Compare and contrast deadlock avoidance and prevention.
- Use functions for file system management

**Course Contents**

**Unit I**

**Introduction**

**04 Hrs**

1.1 Introduction to Operating Systems, Different services provided by Operating System to Users. 1.2 Introduce the concept of Process, Process States, Process Control Block, User Interface, System Calls.  
 1.3 Introduction to Linux Operating System - Features of Linux, Architecture of the Linux, Introduction to File System and Process Environment.

**Unit II**

**File System**

**06 Hrs.**

2.1 File Concept, File Attribute, File Operations, File Types, File Structure  
 2.2 Access Methods - Sequential Access Method, Direct Access Method, Other Access Methods  
 2.3 Directory overview, Single level directory, Two level directory, Tree structure directory, Acyclic graph directory, General graph directory  
 2.4 File System Structure and Implementation - Partitions and Mounting, Virtual File Systems  
 2.5 Allocation Methods - Contiguous allocation, Linked allocation, Indexed allocation  
 2.6 Free Space Management – Bit vector, Linked list, Grouping, Counting, Space maps

**Unit III**

**Process Scheduling and Multithreading**

**06 Hrs.**

3.1 Process Scheduling – Scheduling queues, Schedulers, context switch 3.2 Operations on Process – Process creation with program using fork(), Process termination 3.3 Interprocess Communication – Shared memory system, Message passing systems 3.4 Multithreaded Programming – Overview, Multithreading Models 3.5 Basic Concept – CPU-I/O burst cycle, CPU Scheduler, Pre-emptive Scheduling, Dispatcher 3.6 Scheduling Criteria 3.7 Scheduling Algorithms – FCFS, SJF, Priority scheduling, Round robin scheduling, Multiple queue scheduling, Multilevel feedback queue scheduling		
<b>Unit IV</b>	<b>Deadlock</b>	<b>06 Hrs.</b>
4.1 System Model 4.2 Deadlock Characterization – Necessary Conditions, Resource Allocation Graph 4.3 Deadlock Prevention 4.4 Deadlock Avoidance - Safe state, Resource-Allocation-Graph Algorithm, Banker's Algorithm 4.5 Deadlock Detection 4.6 Recovery from Deadlock – Process Termination, Resource Preemption		
<b>Unit V</b>	<b>Memory Management</b>	<b>08 Hrs.</b>
5.1 Introduction – Requirement of Memory management, Logical and Physical Address Space, Static and dynamic Loading, Static and Dynamic Linking 5.2 Memory Management Techniques- Contiguous memory management schemes, On-Contiguous memory management schemes 5.3 Swapping- Definition, Benefits of swapping 5.4 Memory allocation- Low Memory, High Memory 5.5 Partition Allocation- Best Fit, First Fit, Worst Fit, Next Fit 5.6 Paging- Use of Paging, 5.7 Fragmentation- External & Internal Fragmentation 5.8 Segmentation-Virtual Memory Segmentation, Simple Segmentation 5.9 Dynamic Loading, Dynamic Linking

**CA 505 MJP: Lab course based on CA 502 MJ**

<b>Teaching Scheme:</b>	<b>Credits</b>	<b>Examination Scheme:</b>
<b>Theory: 04 Hours/Week</b>	<b>02</b>	<b>Continuous Evaluation: 15 Marks</b>
		<b>End-Semester : 35 Marks</b>

**Python Assignment List**

**ASSIGNMENT NO.1:-BASIC PYTHON**

- 1) Write a Python Program to Calculate the Average of Numbers in a Given List. 2)
- 2) Write a program which accepts 6 integer values and prints “DUPLICATES” if any of the values entered are duplicates otherwise it prints “ALL UNIQUE”. Example: Let 5 integers are (32, 10, 45, 90, 45, 6) then output “DUPLICATES” to be printed.
- 3) 3) Write a program to display following pattern.

```

1
2 3
4 5 6
7 8 9 10

```

**ASSIGNMENT NO 2:- PYTHON TUPLES**

1. Reverse the following tuple aTup = (10, 20, 30, 40, 50)
2. Write a Python program to create a list of tuples with the first element as the number and second element as the square of the number.
3. Copy element 44 and 55 from the following tuple into a new tuple tuple1 = (11, 22, 33, 44, 55, 66)
4. Write a Python program to get the 5th element from front and 5th element from last of a tuple.
5. Write a Python program to find the repeated items of a tuple.
6. Write a Python program to check whether an element exists within a tuple.

**ASSIGNMENT NO 3:- PYTHON SETS**

1. What is the output of following program:  

```
sets = {1, 2, 3, 4, 4}
print(sets)
```
2. Write a Python program to do iteration over sets.
3. Write a Python program to add and remove operation on set.
4. Write a Python program to find maximum and the minimum value in a set.

**ASSIGNMENT NO.4:- PYTHON DICTIONARY**

1. Write a Python program to combine two dictionary adding values for common keys.  
Sample Dictionary:  

```
d1={'a':100,'b':200,'c':300}
d2={'a':300,'b':200,'d':400}
```

Sample output: Counter({'a': 400, 'b': 400, 'd': 400, 'c': 300})
2. Write a Python script to generate and print a dictionary that contains a number (Between 1 and n) in the form (x, x\*x).  
Sample Dictionary (n = 5)  
Expected Output : {1: 1, 2: 4, 3: 9, 4: 16, 5: 25}
3. Write a Python program to create a dictionary from a string.  
Sample-String: 'W3resource'  
Expected output: {'3': 1, 's': 1, 'r': 2, 'u': 1, 'w': 1, 'c': 1, 'e': 2, 'o': 1}

### **ASSIGNMENT NO.5:-PYTHON ARRAY**

1. Write a python program to create an array of 5 integers and display the array elements. Access individual elements through indexes
2. write a python program to get the number of occurrences of specified elements in an array
3. Write a python program to reverse the order of the items in the array

### **ASSIGNMENT NO.6:-PYTHON FUNCTIONS**

1. Write a python function to sum of all the elements in a list
2. Write a python function to calculate the factorial of a number. the function accept the number as an argument.
3. Write a python function to check whether a number falls within a given range.
4. Write a python function that takes a list and returns a new list with distinct elements from the first list  
Sample list:[1, 2, 2, 3, 3, 3, 3, 4, 5]  
Unique list:[1, 2, 3, 4, 5]

### **DATA STRUCTURES Assignment List**

The lab instructor shall frame suitable assignments

Assignment 1: Searching Algorithms - Implementation of searching algorithms to search an element using: Linear Search, Binary Search

Assignment 2: Sorting Algorithms - Implementation of sorting algorithms: Bubble Sort, Insertion Sort, Quick Sort, Merge Sort

Assignment 3: Singly Linked List - 1. Dynamic implementation of Singly Linked List to perform following operations: Create, Insert, Delete, Display, Search, Reverse 2. Create a list in the sorted order.

Assignment 4: Doubly Linked List - Dynamic implementation of Doubly circular Linked List to perform following operations: Create, Insert, Delete, Display, Search

Assignment 5: Linked List Applications - Merge two sorted lists.

Assignment 6: Stack - Static and Dynamic implementation of Stack to perform following operations: Init, Push, Pop, Isempty, Isfull

Assignment 7: Applications of Stack - 1. Implementation of an algorithm that reverses string of characters using stack and checks whether a string is a palindrome. 2. Infix to Postfix conversion. Evaluation of postfix expression.

Assignment 8: Linear Queue - Static and Dynamic implementation of linear Queue to perform following operations: Init, enqueue, dequeue, IsEmpty, IsFull.

Assignment 9: Circular and Priority Queue 1. Implementation of circular queue 2. Implementation of priority queue

Assignment 10: Tree Traversals, operations etc

Assignment 11 : Calculate indegree and out degree of a given graph

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 510A MJ: Java Programming**

<b>Teaching Scheme: Theory:</b> <b>02 Hours/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>
---	-----------------------------	--

**Course Objectives:**

- To learn implementation of object-oriented concepts with Java.
- To understand collection classes and interfaces.
- To know the process of application development using Graphical User Interface (GUI)

**Course Outcomes:**

On completion of the course, student will be able to–

- Identify classes, objects, class members and relationships for a given problem.
- Design end to end applications using object-oriented constructs.
- Apply collection classes for storing java objects.
- Use Java APIs for program development.
- Handle abnormal termination of a program using exception handling

**Course Contents**

<b>Unit I</b>	<b>Introduction of Java</b>	<b>03 Hrs</b>
1.1 A Short History of Java 1.2 Features of Java 1.3 Java Environment – Compiler, Interpreter, JVM 1.4 Structure of java program 1.5 Data types, Variables, Operators, Keywords, Naming Convention 1.6 Decision Making (if, switch), Looping (for, while) 1.7 Type Casting 1.8 Array, Types of Arrays - One Dimensional arrays - Two-Dimensional array 1.9 Accepting input using Command line arguments 1.10 Accepting input from console (Using BufferedReader and Scanner)		
<b>Unit II</b>	<b>Classes and Objects</b>	<b>04 Hrs</b>
2.1 Introduction to classes and objects 2.2 Defining Your Own Classes 2.3 Access Specifiers (public, protected, private, default) 2.4 Array of Objects 2.5 Constructor, types of constructor (default and parameterized) , Overloading Constructors and use of 'this' Keyword 2.6 static block, static fields and methods 2.7 Predefined class – Object class methods (equals (), toString(), hashCode(), getClass()) 2.8 Garbage Collection (finalize() Method)		
<b>Unit III</b>	<b>Inheritance, Interface and Package</b>	<b>08 Hrs</b>
<b>Inheritance</b> 3.1 Inheritance Basics (extends Keyword) and Types of Inheritance 3.2 Superclass, Subclass and use of super Keyword 3.3 Method Overriding and runtime polymorphism 3.4 Use of final keyword related to variable, method and class 3.5 Use of abstract class and abstract methods <b>Interface</b> 3.6 Defining and Implementing Interfaces 3.7 Runtime polymorphism using interface		

## Packages

### 3.8 Creating, Accessing and using Packages

<b>Unit IV</b>	<b>Collection, Exception Handling and I/O</b>	<b>08 Hrs</b>
----------------	---	---------------

#### Collections

- 4.1 Wrapper Classes
- 4.2 Introduction to the Collection framework
- 4.3 List – ArrayList, LinkedList and Vector
- 4.4 Set - HashSet, TreeSet, and LinkedHashSet
- 4.5 Map – HashTable ,HashMap, LinkedHashMap, TreeMap
- 4.6 Interfaces such as Iterators, ListIterators, Enumerations

#### Exception Handling

- 4.7 Exception class, Checked and Unchecked exception
- 4.8 Catching exception and exception handling – try, catch, finally, throw and throws, multiple catch block
- 4.9 Creating user defined exception

#### I/O

- 4.10 String class(basic methods), String Buffer class
- 4.11 File class
- 4.12 DataInputStream and DataOutputStream class

<b>Unit V</b>	<b>Swing</b>	<b>07 Hrs</b>
---------------	--------------	---------------

- 5.1 What is Swing?
- 5.2 The MVC Architecture and Swing
- 5.3 Layout Manager and Layouts, The JComponent class
- 5.4 Components – JLabel, JButton, JText, JTextArea, JCheckBox, JRadioButton, JList, JComboBox, JMenu and JPopupMenu Class, JMenuItem
- 5.5 Dialogs (Message, confirmation, input), JFileChooser
- 5.6 Event Handling: Event sources, Listeners – ActionListener, ItemListener
- 5.7 Mouse and Keyboard Event Handling, Adapters – MouseAdapter, KeyAdapter

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 511 MJP : Lab Course based on CA 510A MJ**

<b>Teaching Scheme:</b> <b>Practical:02 Hours/Week</b>	<b>Credit</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>
---	----------------------------	--

<b>Unit I</b>	<b>Introduction of Java</b>
---------------	-----------------------------

1. Write a Java program to accept a number from user and generate multiplication table of a number. Accept number using Buffered Reader class.
2. Write a Java Program to Reverse a Number. Accept number using command line argument.
3. Write a Java program to print the sum of elements of the array. Also display array elements in ascending order.
4. Write a Java program to print the factors of a given number. (Use Scanner class).
5. Write a Java program to accept a number from user and print all prime numbers up to that number (Use Buffered Reader class).
6. Write a Java Program to Display Armstrong Numbers Between range. Accept range from user.
7. Write java program to check whether number is Perfect or not.
8. Write Java program to find multiplication of two matrix. Accept matrix from user.

<b>Unit II</b>	<b>Classes and Objects</b>
----------------	----------------------------

1. Define a class MyNumber having one private integer data member. Write a default constructor initialize it to 0 and another constructor to initialize it to a value. Write methods isNegative, isPositive, isOdd, iseven. Use command line argument to pass a value to the object and perform the above operations.
2. Write a program to create class Account (accno, accname, balance). Create an array of 'n' Account objects. Define static method "sortAccount" which sorts the array on the basis of balance. Display account details in sorted order.
3. Write a program which define class Product with data member as id, name and price. Store the information of 5 products and display the name of product having minimum price (Use array of object).
4. Write a program which define class Employee with data member as id, name and salary Store the information of 'n' employees and display the name of employee having maximum salary (Use array of object).
5. Define a class student having rollno, name and percentage. Define Default and parameterized constructor. Accept the 5 student details and display it. (Use this keyword).
6. Write a program create class as MyDate with dd,mm,yy as data members. Write parameterized constructor. Display the date in dd-mm-yy format. (Use this keyword).
7. Define a class Student with attributes rollno and name. Define default and parameterized constructor. Keep the count of Objects created. Create objects using parameterized constructor and display the object count after each object is created.

<b>Unit III</b>	<b>Inheritance, Interface and Package</b>
-----------------	---

**Inheritance**

1. Define a "Point" class having members – x,y(coordinates). Define default constructor and parameterized constructors. Define two subclasses "ColorPoint" with member as color and subclass "Point3D" with member as z (coordinate). Write display method to display the details of different types of Points
2. Define a class Employee having members – id, name, salary. Define default constructor. Create a subclass called Manager with private member bonus. Define methods accept and display in both the classes. Create "n" objects of the Manager

class and display the details of the worker having the maximum total salary (salary + bonus).

3. Write a Java program to create a super class Employee (members – name, salary). Derive a sub-class as Developer (member – projectname). Derive a sub-class Programmer (member – proglanguage) from Developer. Create object of Programmer and display the details of it. Implement this multilevel inheritance with appropriate constructor and methods.
4. Write a Java program to create a super class Vehicle having members Company and Price. Derive two different classes LightMotorVehicle (mileage) and HeavyMotorVehicle (capacity\_in\_tons). Accept the information for “n” vehicles and display the information in appropriate form. While taking data, ask user about the type of vehicle first
5. Define an abstract class Staff with members name and address. Define two sub-classes of this class – FullTimeStaff (members - department, salary, hra - 8% of salary, da – 5% of salary) and PartTimeStaff (members - number-of-hours, rate-per-hour). Define appropriate constructors. Write abstract method as calculateSalary() in Staff class. Implement this method in subclasses. Create n objects which could be of either FullTimeStaff or PartTimeStaff class by asking the user 's choice. Display details of all FullTimeStaff objects and all PartTimeStaff objects along with their salary.
6. Create an abstract class Shape with methods area & volume. Derive a class Cylinder (radius, height). Calculate area and volume.

#### Interface

1. Define an interface “Operation” which has methods area (), volume (). Define a constant PI having a value 3.142. Create a class circle (member – radius), cylinder (members – radius, height) which implements this interface. Calculate and display the area and volume.
2. Define an Interface Shape with abstract method area (). Write a java program to calculate an area of Circle and Sphere. (Use final keyword).

#### Packages

1. Create a package named “Series” having three different classes to print series: a. Fibonacci series b. Cube of numbers c. Square of numbers Write a java program to generate “n” terms of the above series. Accept n from user.
2. Create a package “utility”. Define a class Capital String under “utility” package which will contain a method to return String with first letter capital. Create a Person class (members – name, city) outside the package. Display the person's name with first letter as capital by making use of Capital String.
3. Write a package game which will have 2 classes Indoor & Outdoor. Use a function display () to generate the list of players for the specific game. Use default & parameterized constructor

### Unit IV

### Collection, Exception Handling and I/O

#### Collections

1. Construct a linked List containing names of colours: red, blue, yellow and orange. Then extend the program to do the following: i. Display the contents of the List using an Iterator ii. Display the contents of the List in reverse order using a ListIterator iii. Create another list containing pink and green. Insert the elements of this list between blue and yellow
2. Write a program to accept 'n' integers from the user & store them in an Array List collection. Display the elements of Array List.
3. Accept 'n' integers from the user and store them in a collection. Display them in the sorted order. The collection should not accept duplicate elements. (Use a suitable collection). Search for a particular element using predefined search method in the Collection framework.

4. Create a Hash table containing Employee name and Salary. Display the details of the hash table.
5. Create a java application to store city names and their STD codes using an appropriate collection. i. Add a new city and its code (No duplicates) ii. Remove a city from the collection iii. Search for a cityname and display the code

### Exception Handling

1. Write a java program to accept a number from the user, if number is zero then throw user defined exception —Number is 0, otherwise check whether no is prime or not.
2. Write a java program to accept Doctor Name from the user and check whether it is valid or not. (It should not contain digits and special symbol) If it is not valid then throw user defined Exception - Name is Invalid -- otherwise display it
3. Define a class MyDate (day, month, year) with methods to accept and display a MyDate object. Accept date as dd, mm, yyyy. Throw user defined exception “InvalidDateException” if the date is invalid. Examples of invalid dates : 12 15 2015, 31 6 1990, 29 2 2001.
4. Write a class Driver with attributes license\_no, name, address and age. Initialize values through the parameterized constructor. If age of Driver is less than 18 then user-defined exception should be generated —Age is below 18 years –
5. Write a class Student with attributes roll no, name, age and course. Initialize values through parameterized constructor. If age of student is not in between 15 and 21 then generate user-defined exception —Age Not Within The Range. If name contains numbers or special symbols raise exception —Name not valid

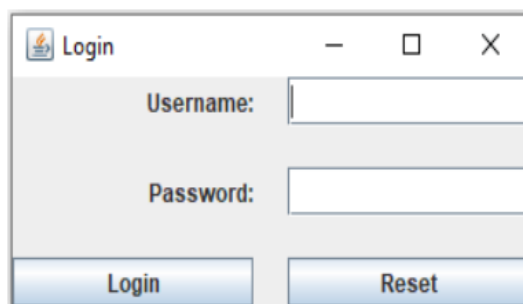

### I/O

1. Write a java program that displays the number of characters, lines and words of a file.
2. Write a java program to accept details of n customers (c\_id, cname, address, mobile\_no) from user and store it in a file (Use DataOutputStream class). Display the details of customers by reading it from file. (Use DataInputStream class).
3. Write a program to read the contents of “abc.txt” file. Display the contents of file in uppercase as output.

### Unit V

### Swing

1. Write a java program to design a following GUI. Use appropriate Layout and Components.

2. Write a java program to design a following GUI. Use appropriate Layout and Components.

**Vaccination Details**

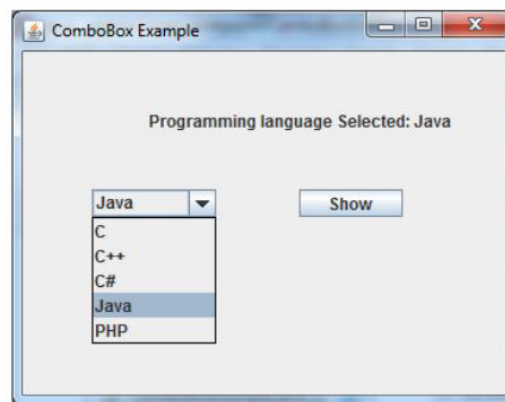

Name:

<p><b>Dose</b></p> <p><input type="checkbox"/> 1<sup>st</sup> Dose</p> <p><input type="checkbox"/> 2<sup>nd</sup> Dose</p>	<p><b>Vaccine</b></p> <p><input type="radio"/> Covishield</p> <p><input type="radio"/> Covaxin</p> <p><input type="radio"/> Sputnik V</p>
--	---

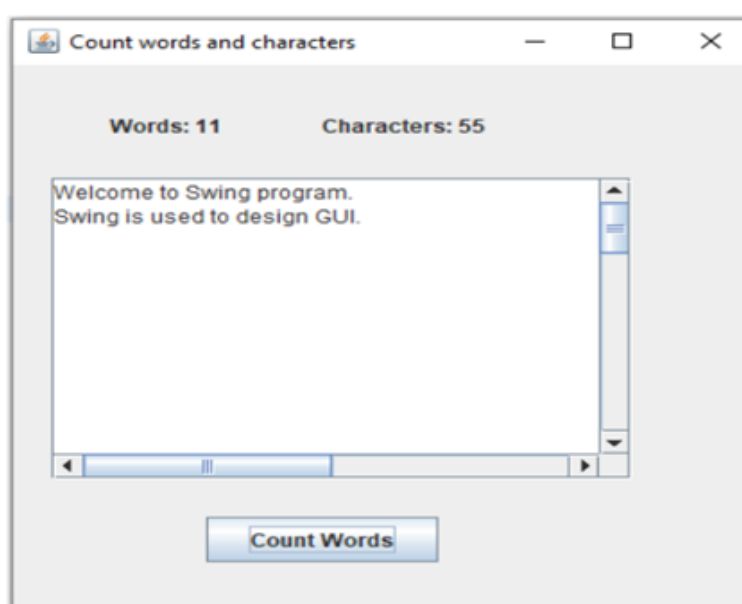

Name : \_\_\_\_\_ 1<sup>st</sup> Dose: \_\_\_\_\_ 2<sup>nd</sup> Dose: \_\_\_\_\_

Vaccine: \_\_\_\_\_

3. Write a java program to implement a simple arithmetic calculator. Perform appropriate validations
4. Write a Program to design following GUI by using swing component JComboBox. On click of show button display the selected language on JLabel.

5. Write a program to design following GUI using JTextArea. Write a code to display number of words and characters of text in JLabel. Use JScrollPane to get scrollbars for JTextArea.

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 512B MJ: Cloud Computing**

<b>Teaching Scheme:</b> <b>Theory: 02 Hours/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester :35 Marks</b>
---	-----------------------------	---

**Course Objectives:**

- To understand the principles and paradigm of Cloud Computing
- To appreciate the role of Virtualization Technologies
- Ability to design and deploy Cloud Infrastructure
- Understand Advanced Techniques and cloud security issues and solutions

**Course Outcomes:**

On completion of the course, student will be able to–

- Understand the different Cloud Computing environment
- Analyze virtualization technology and install virtualization software
- Develop and deploy applications on Cloud
- Use advance techniques and apply security in Cloud Computing

**Course Contents**

<b>Unit I</b>	<b>Introduction to Cloud Computing</b>	<b>08 Hrs</b>
Overview, Layers and Types of Cloud, Desired Features of a Cloud, Benefits and Disadvantages of Cloud Computing, Cloud Infrastructure Management, Infrastructure as a Service Providers, Platform as a Service Providers, Multitenant Technology. Cloud-Enabling Technology: Broadband Networks and Internet Architecture, Data Center Technology, Virtualization Technology. Cloud Deployment Models.		
<b>Unit II</b>	<b>Virtualization</b>	<b>06 Hrs</b>
Introduction to Virtualization Technologies, Load Balancing and Virtualization, Understanding Hyper visors, Virtual Machines Provisioning and Manageability Virtual Machine Migration Services, Provisioning in the Cloud Context		
<b>Unit III</b>	<b>Programming, Environments and Applications</b>	<b>08 Hrs</b>
Features of Cloud and Grid Platforms, Programming Support of Google App Engine, Programming on Amazon AWS and Microsoft Azure, Emerging Cloud Software Environments, Applications: Moving application to cloud, Microsoft Cloud Services, Google Cloud Applications, Amazon Cloud Services, Cloud Applications.		
<b>Unit IV</b>	<b>Advanced Techniques and Security in The Cloud</b>	<b>08 Hrs</b>
Future Trends in cloud Computing, Mobile Cloud, Comet Cloud. Containers, Docker, and Kubernetes, Introduction to DevOps. Security Overview – Cloud Security Challenges and Risks – Software-as-a-Service Security – Security Governance – Risk Management – Security Monitoring – Security Architecture Design – Data Security – Application Security – Virtual Machine Security - Identity Management and Access Control, Disaster Recovery in Clouds.

- Ability to design and deploy Cloud Infrastructure
- Understand Advanced Techniques and cloud security issues and solutions

**Course Outcomes:**

On completion of the course, student will be able to–

- Understand the different Cloud Computing environment
- Analyze virtualization technology and install virtualization software
- Develop and deploy applications on Cloud
- Use advance techniques and apply security in Cloud Computing

**Course Contents**

**Assignments**

1. Working and Implementation of Infrastructure as a service.
2. Working and Implementation of Software as a service.
3. Working and Implementation of Platform as a services.
4. Practical Implementation of Storage as a Service
5. Installation and Configuration of Virtualization Using KVM
6. Working of Google drive to make spreadsheet and notes.
7. Write a program for web feed.
8. Implementation of Virtualization in cloud computing to learn Virtualization Basics, Benefits of Virtualization in Cloud using Open Source Operating System.
9. Execute the step to Demonstrate and implementation of cloud on single sign on.
10. Installation and configuration of cloud Hadoop and demonstrate simple query
11. Installing and Developing Application Using Google App Engine
12. Case study on Amazon EC2/Microsoft Azure/Google Cloud Platform
13. Design an Assignment based on working with Manjrasoft Aneka Software.
14. Design and Develop Custom Application (Mini Project) using Salesforce Cloud.

**Savitribai Phule Pune University**

**CA 531 RM: Research Methodology**

<b>Teaching Scheme:</b> <b>Theory: 04 Hours/Week</b>	<b>Credits</b> <b>04</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 30 Marks</b> <b>End-Semester : 70 Marks</b>
---	-----------------------------	--

**Course Objectives:**

- To investigate some existing situation or problems, explore and analyze it.
- To test hypothesis or theory.
- To identify patterns or trends related to the problem.
- To discover the truth and fact.
- To study the process of quantitative and qualitative data collection.

**Course Outcomes:**

On completion of the course, student will be able to–

- Understand and comprehend the basics in research methodology.
- Formulate research aims and objectives
- Organize and conduct research (advanced project) in a more appropriate manner.
- Develop and practice the skills necessary to conduct, review, and publish research.
- Write a research report and thesis.

<ul style="list-style-type: none"> <li>• Action Research</li> <li>• Experimental Research</li> <li>• Analytical Study or Statistical Method</li> <li>• Historical Research</li> <li>• Surveys</li> <li>• Case Study</li> <li>• Field Studies</li> <li>• Research ethics</li> <li>• Plagiarism Tools</li> </ul>		
<b>Unit IV</b>	<b>Literature Survey and Formulation of Research Problem</b>	<b>10 Hrs</b>
<ul style="list-style-type: none"> <li>• Purpose of Literature Review</li> <li>• Literature Resources</li> <li>• Internet and literature review</li> <li>• The Research Problem</li> <li>• The Importance of Formulating a Research Problem</li> <li>• Steps in Formulation of Research Problem</li> <li>• Formulation of Objectives</li> <li>• Establishing Operational Definitions</li> </ul>		
<b>Unit V</b>	<b>Hypothesis and Sampling</b>	<b>10 Hrs</b>
<ul style="list-style-type: none"> <li>• What is Hypothesis?</li> <li>• Nature &amp; Characteristics of Hypothesis</li> <li>• Significance of Hypothesis</li> <li>• Types of Hypothesis</li> <li>• Sources of Hypothesis</li> <li>• Characteristics of Good Hypothesis</li> <li>• What is Sampling?</li> <li>• Aims of Sampling</li> <li>• Characteristics of Good Sample</li> <li>• Basis of Sampling</li> <li>• Advantages of Sampling</li> <li>• Limitations of Sampling</li> <li>• Sampling Techniques or Methods</li> <li>• Probability Sampling Methods</li> <li>• Non-Probability Sampling Methods</li> <li>• Sample Design and Choice of Sampling Technique</li> </ul>		
<b>Unit VI</b>	<b>Data Collection Techniques</b>	<b>06 Hrs</b>

- Introduction
- Distinction between Primary Data and Secondary Data
- Data Collection Procedure for Primary Data
  - Methods of Data Collection –Observation, Questionnaire, Interview, Focus group discussion
- 

<b>Unit VII</b>	<b>Quantitative and Qualitative Data Analysis</b>	<b>10 Hrs</b>
-----------------	---	---------------

- What is Quantitative Data?
- Types of Quantitative Data
- Data Coding
  - Visual Aids for Quantitative Data Analysis-Tables, Bar Charts, Scatter graph, Line Graph etc.
- Use of Statistics for Quantitative Data Analysis
  - Measures of Central Tendency-Mean, Median, Mode
  - Measures of Distribution-Range, Fractiles, Standard Deviation
  - Finding Relationships in the data-Chi-Square, t-test, ANNOVA(f-test),Z-test
- What is Qualitative Data Analysis?
- Analyzing textual and non-textual qualitative data
- Grounded Theory
- Computer-aided qualitative Analysis
- Quantitative and Qualitative Data Analysis Tools

<b>Unit VIII</b>	<b>Presentation of the Research</b>	<b>03 Hrs</b>
------------------	-------------------------------------	---------------

- Writing up the research
- Paper presentation in Conference/Journal/Symposium etc
- Poster presentation in exhibition
- Software demonstration
- Case Study -Preparation of Sample Research Paper

#### **Books :**

1. Researching Information Systems and Computing by Briony J Oates, SAGE SOUTH ASIA EDITION
2. The Research Methods Knowledge Base, by William M. K. Trochim, James P. Donnelly
3. Introducing Research Methodology: A Beginner's Guide to Doing a Research Project , by Uwe Flick

# SEMESTER II

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 551 MJ: Web Technologies**

<b>Teaching Scheme:</b> <b>Theory: 04 Hours/Week</b>	<b>Credits</b> <b>04</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 30 Marks</b> <b>End-Semester : 70 Marks</b>
---	-----------------------------	--

**Course Objectives:**

- To understand and learn HTML and CSS
- To learn PHP programming and database connectivity
- To understand and learn AJAX and XML

**Course Outcomes:**

On completion of the course, student will be able to–

- Develop web based application using suitable client side and server side web technologies.
- Build Dynamic web site using server side PHP Programming and Database connectivity.
- Build applications using AJAX and XML

**Course Contents**

<b>Unit I</b>	<b>Introduction to Web Technology, HTML and CSS</b>	<b>06Hrs</b>
1.1 Introduction to Web Technologies (Define terms : web page, web site, Web Browser, Web Server, URL, www) 1.2. How the Website Works? 1.3. Software to create your website (Traditional method and best website builder) 1.4. What makes good website? 1.5. Client-Server and its Communication 1.6. Internet-Basic, Internet Protocols (HTTP,FTP,IP) 1.7. Types of Websites: Static and Dynamic Websites 1.8Introduction to HTML (different tags, Inserting Image , List, Tables , Text and Image links, Frames, Forms and controls: ( text box, buttons controls like submit, reset, radio, checkbox and List box). 1.9 Introduction to CSS, CSS types, CSS Border, margin, Positioning, color, text, link, list, table, padding, image, display properties. 1.10 Use of <div> , <span> , Id & classes in CSS .		
<b>Unit II</b>	<b>Introduction to PHP</b>	<b>08 Hrs</b>
2.1. Introduction to PHP 2.2. PHP - Lexical structure, Language basics. 2.3. Echo, Print Statement 2.4. Variables, Data Types 2.5. Operators 2.6. Control Structures 2.7. Strings		
<b>Unit III</b>	<b>Function and Array in PHP</b>	<b>08 Hrs</b>
3.1. Defining and calling a function 3.2 Default parameters 3.3 Variable parameters, Missing parameters 3.4 Variable function, Anonymous function		

3.5 Indexed Vs Associative arrays 3.6 Identifying elements of an array 3.7 Storing data in arrays 3.8 Multidimensional arrays 3.9 Extracting multiple values 3.10 Traversing arrays 3.11 Sorting Using arrays		
<b>Unit IV</b>	<b>Object Oriented Programming</b>	<b>6 Hrs</b>
4.1 Classes 4.2 Objects 4.3 Introspection 4.4 Serialization 4.5 Inheritance 4.6 Interfaces 4.7 Encapsulation		
<b>Unit V</b>	<b>Web Techniques</b>	<b>08 Hrs</b>
5.1 Variables 5.2 Server information 5.3 Processing forms 5.4 Setting response headers 5.5 Maintaining state 5.6 SSL		
<b>Unit VI</b>	<b>Databases</b>	<b>10 Hrs</b>
6.1 Using PHP to access a database 6.2 Relational databases and SQL 6.3 PEAR DB basics 6.4 Advanced database techniques 6.4 Sample application (Mini project)		
<b>Unit VII</b>	<b>JavaScript</b>	<b>06 Hrs</b>
7.1 Concept of script, Types of Scripts : client side scripting language and server side scripting language, Introduction to javascript 7.2 Data types, Variables, comments in JavaScript , operators, control structures. 7.3 Functions 7.4 Event Handling in Java Scripts (Event types, dialogue boxes) 7.5 Concept of array, how to use it in JavaScript ,JavaScript array method, types of an Array 7.6 Concept of String 7.7 DOM concept in JavaScript - Methods of document object, How to access field value by document object.		
<b>Unit VIII</b>	<b>XML and Ajax</b>	<b>08 Hrs</b>
8.1 What is XML? 8.2 XML document Structure 8.3 PHP and XML 8.4 XML parser 8.5 The document object model 8.6 The simple XML extension 8.7 Changing a value with simple XML 8.8 Understanding java scripts for AJAX 8.9 AJAX web application model 8.10 AJAX –PHP framework 8.11 Performing AJAX validation		

**8.12 Handling XML data using PHP and AJAX**  
**8.13 Connecting database using PHP and AJAX**

**Books:**

1. Steven Holzner, "HTML Black Book", Dremtech press.
2. Web Technologies, Black Book, Dreamtech Press
3. Web Applications : Concepts and Real World Design, Knuckles, Wiley-India
4. Internet and World Wide Web How to program, P.J. Deitel & H.M. Deitel Pearson
5. Programming PHP By Rasmus Lerdorf and Kevin Tatroe, O'Reilly publication
6. Beginning PHP 5 , Wrox publication 7. PHP web services, Wrox publication
8. AJAX Black Book, Kogent solution 9. Mastering PHP , BPB Publication
10. PHP cookbook, O'Reilly publication
11. PHP for Beginners, SPD publication 8. Programming the World Wide Web , Robert W Sebesta(3rd Edition)

**E-Resources (E-books, Swayam/NPTEL Videos, Research Papers, URLs for Case studies, online tutorials, tools, blogs, Swayam/NPTEL courses etc):**

2. <https://www.tutorialspoint.com>
3. <https://www.php.net>
4. Thinking in HTML eBook by Aravind Shenoy
5. The Complete Reference – Steven Holzner  
<https://books.google.co.in/books?id=bGS4CmJY0I8C&printsec=frontcover&dq=PHP+ebook&hl=en&sa=X&ved=0ahUKEwjI4PuNoKLpAhURwTgGHXadDbYQ6AEIVTAF#v=onepage&q&f=false>
6. Programming PHP – Rasmus Lerdorf, Kevin Tatroe and Peter Macintyre  
<https://books.google.co.in/books?id=h-E1IVkoskC&printsec=frontcover&dq=PHP+ebook&hl=en&sa=X&ved=0ahUKEwjI4PuNoKLpAhURwTgGHXadDbYQ6AEIcDAI#v=onepage&q=PHP%20ebook&f=false>
7. PHP MySQL, JavaScript & HTML5 – Ailey Brand  
<https://books.google.co.in/books?id=p9BuBgAAQBAJ&printsec=frontcover&dq=PHP+ebook&hl=en&sa=X&ved=0ahUKEwjI4PuNoKLpAhURwTgGHXadDbYQ6AEIQTAD#v=onepage&q&f=false>

<p style="text-align: center;"><b>Savitribai Phule Pune University</b>  <b>First Year of Master of Computer Applications (2023 Course)</b>  <b>CA 552 MJ: Introduction to Data Science</b></p>		
<b>Teaching Scheme:</b> <b>Theory: 04</b> <b>Hours/Week</b>	<b>Credits 4</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 30</b> <b>Marks End-Semester : 70</b> <b>Marks</b>
<b>Course Objectives</b> <ul style="list-style-type: none"> <li>• Provide students with knowledge and skills for data-intensive problem solving and scientific discovery</li> <li>• Be prepared with a varied range of expertise in different aspects of data science such as data collection, visualization, processing and modeling of large data sets.</li> <li>• Acquire good understanding of both the theory and application of applied statistics and computer science based existing data science models to analyze huge data sets originating from diversified application areas.</li> <li>• Be better trained professionals to cater the growing demand for data scientists in industry.</li> </ul>		
<b>Course Outcomes</b> On completion of the course, student will be able to– <ul style="list-style-type: none"> <li>• Perform Exploratory Data Analysis</li> <li>• Obtain, clean/process, and transform data.</li> <li>• Detect and diagnose common data issues, such as missing values, special values, outliers, inconsistencies, and localization.</li> <li>• Demonstrate proficiency with statistical analysis of data.</li> <li>• Present results using data visualization techniques.</li> <li>• Prepare data for use with a variety of statistical methods and models and recognize how the quality of the data and the means of data collection may affect conclusions.</li> </ul>		
<b>Course Contents</b>		
<b>Unit 1</b>	<b>Introduction to Data Science</b>	<b>12 lectures</b>
Introduction to data science, The 3 V's: Volume, Velocity, Variety, Why learn Data Science? Applications of Data Science The Data Science Lifecycle Data Scientist's Toolbox Types of Data Structured, semi-structured, Unstructured Data, Problems with unstructured data Data sources Open Data, Social Media Data, Multimodal Data, standard datasets: Data Formats Integers, Floats, Text Data, Text Files, Dense Numerical Arrays, Compressed or Archived Data, CSV Files, JSON Files, XML Files, HTML Files , Tar Files, GZip Files, Zip Files, Image Files: Rasterized, Vectorized, and/or Compressed		

<b>Unit 2</b>	<b>Statistical Data Analysis</b>	<b>16 lectures</b>
Role of statistics in data science Descriptive statistics <ul style="list-style-type: none"> <li>Measuring the Frequency</li> <li>Measuring the Central Tendency: Mean, Median, and Mode</li> <li>Measuring the Dispersion: Range, Standard deviation, Variance, InterquartileRange</li> </ul> Inferential statistics <ul style="list-style-type: none"> <li>Hypothesis testing, Multiple hypothesis testing, Parameter Estimation methods,</li> </ul> Measuring Data Similarity and Dissimilarity <ul style="list-style-type: none"> <li>Data Matrix versus Dissimilarity Matrix, Proximity Measures for Nominal Attributes, Proximity Measures for Binary Attributes, Dissimilarity of NumericData: Euclidean, Manhattan, and Minkowski distances, Proximity Measures for Ordinal Attributes</li> </ul> Concept of Outlier, types of outliers, outlier detection methods		
<b>Unit 3</b>	<b>Data Preprocessing</b>	<b>16 lectures</b>
Data Objects and Attribute Types: What Is an Attribute?, Nominal , Binary, Ordinal Attributes, Numeric Attributes, Discrete versus Continuous Attributes Data Quality: Why Preprocess the Data? Data munging/wrangling operations Cleaning Data - Missing Values, Noisy Data (Duplicate Entries, Multiple Entries for a Single Entity, Missing Entries, NULLs, Huge Outliers, Out-of- Date Data, Artificial Entries, Irregular Spacings, Formatting Issues - Irregular between Different Tables/Columns, Extra Whitespace, Irregular Capitalization, Inconsistent Delimiters, Irregular NULL Format, Invalid Characters, Incompatible Datetimes) Data Transformation – Rescaling, Normalizing, Binarizing, Standardizing, Label and OneHot Encoding Data reduction Data discretization		
<b>Unit 4</b>	<b>Data Visualization</b>	<b>16 lectures</b>
Introduction to Exploratory Data Analysis Data visualization and visual encoding Data visualization libraries Basic data visualization tools <ul style="list-style-type: none"> <li>Histograms, Bar charts/graphs, Scatter plots, Line charts, Area plots, Pie charts, Donut charts</li> </ul> Specialized data visualization tools <ul style="list-style-type: none"> <li>Boxplots, Bubble plots, Heat map, Dendrogram, Venn diagram, Treemap, 3D scatter plots</li> </ul> Advanced data visualization tools- Wordclouds Visualization of geospatial data Data Visualization types		
<b>Reference Books:</b>		
1) Data Science Fundamentals and Practical Approaches, Gypsy Nandi, Rupam Sharma, BPB Publications, 2020. 2) The Data Science Handbook, Field Cady, John Wiley & Sons, Inc, 2017 3) Data Mining Concepts and Techniques, Third Edition, Jiawei Han, Micheline		

**Kamber, Jian Pei, Morgan Kaufmann, 2012.**

**4) A Hands-On Introduction to Data Science, Chirag Shah, University of  
Washington Cambridge University Press**

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**  
**CA 553 MJ: Computer Networks**

<b>Teaching Scheme:</b> <b>TH: 02 Hours/Week</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>
---	-----------------------------	--

**Course Objectives:**

- To understand the fundamental concepts of networking standards, protocols and technologies.
- To study different techniques for framing, error control, flow control and routing.
- To learn role of protocols at various layers in the protocol stacks.
- To develop an understanding of modern network architectures from a design and performance perspective

**Course Outcomes:** After successful completion of this course, learner will be able to-

- Analyze the requirements for a given organization and select appropriate network architecture, topologies, transmission mediums and technologies.
- Analyze data flow between TCP/IP model using Application, Transport and Network Layer Protocols.
- Illustrate applications of Computer Network.
- Compare and contrast different routing and switching algorithms

**Course Contents**

<b>Unit I</b>	<b>Introduction to Data Communications Computer Networks</b>	<b>06 Hrs</b>
---------------	--	---------------

Data communications, Characteristics of Data Communication  
 Components of Data communication  
 Data Representation – Text, Numbers, Images, Audio, Video  
 Types of Data flow – Simplex, Half Duplex, Full Duplex  
 Computer Networks applications –Business Application, Home Application, Mobile User  
 Broadcast and point-to-point networks  
 Network Topologies - Bus, Star, Ring, Mesh  
 Network Types- LAN, MAN, WAN, PAN, Wireless Networks, Home Networks, internetworks  
 Protocols and standards – Definition of a Protocol, Protocol standards: De facto and De jure  
 OSI Model – layered architecture, peer-to-peer processes, encapsulation  
 TCP/IP Model – layers and Protocol Suite  
 Addressing-Physical, Logical, Port addresses, Specific addresses

<b>Unit II</b>	<b>Physical Layer</b>	<b>06 Hrs</b>
----------------	-----------------------	---------------

Analog and Digital data, Analog and Digital signals, Digital Signals-Bit rate, Bit length  
 Baseband Transmission, Broadband Transmission  
 Transmission Impairments– Attenuation, Distortion and Noise  
 Data Rate Limits– Noiseless channel: Nyquist's bit rate, noisy channel : Shannon's law  
 Performance of the Network Bandwidth, Throughput, Latency (Delay), Bandwidth – Delay Product, Jitters  
 Line Coding Characteristics, Line Coding Schemes–Unipolar -NRZ, Polar-NRZ-I, NRZ-L, RZ, Manchester and Differential Manchester, Problems  
 Transmission Modes, Parallel Transmission and Serial Transmission– Asynchronous and Synchronous and Isochronous  
 Multiplexing FDM and TDM  
 Switching-Circuit Switching, Message Switching and Packet Switching.

<b>Unit III</b>	<b>Data Link Layer</b>	<b>05 Hrs</b>
-----------------	------------------------	---------------

Framing – Concept, Methods – Character Count, Flag bytes with Byte Stuffing, Starting & ending Flags with Bit Stuffing  
 Error detection code – Hamming Distance, CRC  
 Elementary data link protocols - Simplex stop & wait protocol, Simplex protocol for noisy channel, PPP, HDLC  
 Sliding Window Protocols – 1-bit sliding window protocols, Pipelining – Go-Back N and Selective Repeat  
 Random Access Protocols - ALOHA– pure and slotted, CSMA-1- persistent, p-persistent and non-persistent CSMA/CD, CSMA/CA  
 Controlled Access - Reservation, Polling and Token Passing  
 Channelization – Definitions – FDMA, TDMA and CDMA

Unit IV	Network Layer	05 Hrs
IPv4 addresses: Address space, Notation, Classful addressing, Classless addressing, NAT, Sub netting, Super netting IPv4: Datagram, Fragmentation, checksum, options IPv6 addresses: Structure, address space IPv6: packet format, Extension headers		

Unit V	Transport and Application Layer	08 Hrs
Process-to-Process Delivery, Multiplexing and De-multiplexing User Datagram Protocol (UDP) - Datagram Format, Checksum, UDP operations, Use of UDP 6.3. Transmission Control Protocol (TCP) - TCP Services – Process to-Process Communication, Stream Delivery Service, Sending and Receiving Buffers, Segments, Full – Duplex Communication, Connection oriented service, Reliable service TCP Features – Numbering System, Byte Number, Sequence Number, Acknowledgement Number, Flow Control, Error Control, Congestion Control TCP Segment Format TCP Vs UDP Domain Name System (DNS) - Distribution of Name Space, DNS in the Internet E-MAIL - Architecture, User Agent, Message Transfer Agent - SMTP, Web Based Mail WWW – Architecture HTTP - HTTP Transaction

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 554 MJP: Lab Course based on CA 551 MJ**

<b>Teaching Scheme</b> <b>Practical: 4 hrs / week</b>	<b>No. of Credits</b> <b>02</b>	<b>Examination Scheme</b> <b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>
--	------------------------------------	---

Sr.No.	Practical Assignment : Set I (HTML and CSS )
1	Write HTML programs to display the message “Welcome to Web Technology”
2	Write HTML programs to display word “HTML” in size of h1 to h6
3	Write HTML script to display the text in bold, italic, underline and with strike. Apply separate effect on different text.
4	Write HTML programs to display : H <sub>2</sub> O and $A^2 + B^2 = C^2$
5	Write HTML script that will use image as a background.
6	Create an html page with following specifications : a. Title should be about “My City” b. Place your City name at the top of the page in large text and in red color c. Add names and images (as a link) of landmarks in your city each in a different color, style and typeface . d. After clicking on images it should display history of that place.
7	Write HTML code to display following output. <div style="margin-left: 40px;"> <ul style="list-style-type: none"> <li>▪ Tea <ul style="list-style-type: none"> <li>○ Hot tea</li> <li>○ Black tea</li> </ul> </li> <li>▪ Coffee <ul style="list-style-type: none"> <li>• Cold coffee</li> <li>• Hot coffee</li> </ul> </li> </ul> </div>
8	Write HTML code to display the list of different courses available in our college using ordered as well as unordered list.
9	Design a table which shows weekly time table of a specific class.
10	Divide a screen in four equal part . Each frame shows : list of different activities conducted by your department.
11	Design a admission form. which should contains : text box, multiline text box, a table which shows your academic record, radio button, check box, submit button etc.
12	Write inline CSS program to display with background color pink with red colored text.
13	Write internal CSS program to display with background color black with white colored text.
14	Write external CSS program to display with background color sky blue with blue colored text.
15	Write CSS using HTML which uses of text decoration, border, padding and margin.
16	Write CSS using HTML which displays following output <div style="margin-left: 40px;"> <p><b>Positioning in CSS : Static, Relative, Fixed and Absolute</b></p> <div style="border: 1px solid red; padding: 2px; margin-bottom: 5px;">This div element has position: static;</div> <div style="border: 1px dotted blue; padding: 2px;">This div element has position: relative;</div> </div>

This div element has position: absolute;

This div element has position: fixed;

**17** Write CSS using HTML which displays following output

**List Property in CSS**

**Unordered lists**

- Coffee
- Tea
- Milk
  
- Apple
- Mango
- Banana
- Watermelon

**Ordered list**

- I. Rose
- II. Jasmine
- III. Marigold
  
- a. Sunflower
- b. Tulip
- c. Lily
- d. Tuberoose

**18** Write CSS using HTML which displays following output

**Add a border to a table:**

Firstname	Lastname
Ram	Joshi
Sham	Kulkarni

**19** Write CSS using HTML which displays following output : use image property

**20** Write CSS using HTML which displays following output

	<h2>The display Property</h2> <p><b>Display : none</b></p> <p><b>Display : inline</b></p> <p>Web Technology !</p> <p><b>Display : block</b></p> <p>Web Technology !</p> <p><b>Display : inline-block</b></p> <p>Web Technology !</p>
21	<p>Write CSS using HTML which displays following output : Use of Id and classes in CSS</p> <p>Web Technology !</p> <p>This paragraph is not affected by the style.</p> <p><b>Web Technology !</b></p> <p>This paragraph is affected by the style.</p>
22	<p>Write CSS using HTML which displays following output : Use of &lt;div&gt; and &lt;span&gt; in CSS</p> <p><b>The &lt; div &gt;</b></p> <div> <p>Web Technology !</p> <p>MCA (Science)</p> </div> <p>Computer Application !</p> <p><b>The &lt; span &gt; element !</b></p> <p>I have a <b>Red</b> rose and dark <b>Chocolate</b>.</p>
<b>Sr.No.</b>	<b>Practical Assignment : Set II (Introduction to PHP)</b>
1	Write a PHP script for the following. a) Design a form to accept the details of 5 different items such as Item code, Item Name, unit, sold and Rate. b) Display the bill in tabular format. Use only 4 textboxes. [ Use explode]
2	Design a HTML form to accept a string. Write a PHP script for the following. a) Write a function to count the total number of Vowels from the script. b) Show the occurrences of each Vowel from the script
3	Write a PHP script for the following. Design a form to accept a string and check whether the given string is Palindrome or not.
4	Write a PHP Script to accept customer Name from user and do the following a) Transform Customer Name all Upper case latter. b) Make First character to Upper Case.
5	<p>Write a PHP script to print following floyd's triangle.</p> <pre> 1 2 3 4 5 6 7 8 9 10 </pre>

6	Write a PHP script to display source code of a webpage.
7	Write a PHP script to test whether a number is greater than 30, 20 or 10 using ternary operator.
8	Write a PHP script to display Multiplication table in tabular format. Design HTML page to accept value.
9	Write a PHP script to display Number in words. Design HTML page to accept number.
10	Write a PHP script to accept details of Employee (Name, Salary, Designation, Address) and display it on next page.
<b>Sr.No.</b>	<b>Practical Assignment : Set III (Function and Array)</b>
1	Write a PHP script to accept the number from user and Write a PHP function to calculate the factorial of a number (a non-negative integer). The function accepts the number as an argument.
2	Design a HTML form to accept a string. Write a PHP function that checks whether a passed string is a palindrome or not?
3	Design a HTML form to accept a string. Write a PHP script for the following. a) Write a function to count the total number of Vowels from the script. b) Show the occurrences of each Vowel from the script.
4	Write a PHP script for the following: a) Design a form to accept two numbers from the users. b) Give option to choose an arithmetic operation (use Radio Button). c) Display the result on next form. d) Use concept of default parameter.
5	Write a PHP script for the following: Design a form to accept two strings. Compare the two strings using both methods (= = operator & strcmp function). Append second string to the first string. Accept the position from the user; from where the characters from the first string are reversed. (Use radio buttons)
6	Write a menu driven program to perform the following operations on an associative array: a) Display the elements of an array along with the keys. b) Display the size of an array
7	Write a menu driven program the following operation on an associative array a) Reverse the order of each element's key-value pair. [Hint: array_flip()] b) Traverse the element in an array in random order. [Hint: shuffle()]
8	Declare array. Reverse the order of elements, making the first element last and last element first and similarly rearranging other array elements.[Hint : array_reverse()]
9	Write a menu driven program to perform the following stack related operations. a) Insert an element in stack. b) Delete an element from stack.[Hint: array_push(), array_pop()]
10	Write a menu driven program to perform the following operations on associative arrays: a) Merge the given arrays. b) Find the intersection of two arrays. c) Find the union of two arrays. d) Find set difference of two arrays.
11	Write a menu driven program to perform the following queue related operations a) Insert an element in queue b) Delete an element from queue c) Display the contents of queue
<b>Sr.No.</b>	<b>Practical Assignment : Set IV(Class and Object)</b>
1	Write a PHP program to define Interface shape which has two method as area() and volume (). Define a constant PI. Create a class Cylinder implement this interface and calculate area and Volume.

2	<p>a) Write a PHP script to create a Class shape and its subclass triangle, square and display area of the selected shape.( use the concept of Inheritance) Display menu (use radio button)</p> <p>a) Triangle b) Square c) Rectangle d) Circle</p>
3	Write PHP script to demonstrate the concept of introspection for examining object.
4	Create a class named DISTANCE with feet and inches as data members. The class has the following member functions: convert_feet_to_inch() , convert_inch_to_feet() . Display options using radio button and display conversion on next page.
5	Write a PHP program to create a class temperature which contains data members as Celsius and Fahrenheit . Create and Initialize all values of temperature object by using parameterized constructor . Convert Celsius to Fahrenheit and Convert Fahrenheit to Celsius using member functions. Display conversion on next page.
6	Write a Calculator class that can accept two values, then add them, subtract them, multiply them together, or divide them on request.
7	Write a PHP Script to create a super class Vehicle having members Company and price. Derive 2 different classes LightMotorVehicle (members – mileage) and HeavyMotorVehicle (members – capacity-in-tons). Define 5 Object of each subclass and display details in table format .
<b>Sr.No.</b>	<b>Practical Assignment : Set V (Web Techniques)</b>
1.	<p>Write a PHP script to display following information using super global variable.</p> <p>a) Client IP Address. b) Browser detection/information. C) To check whether the page is called from 'https' or 'http'.</p>
2	Write a PHP script to keep track of number of times the web page has been access. [Use Session]
3	Write a PHP script to accept username and password. If in the first three chances, username and password entered is correct then display second form with 'welcome message' otherwise display error message. [ Use Session]
4	Write a PHP script to accept Employee details ( eno, ename, address) on first page. On second page accept earning ( Basic, Da, HRA). On third page print Employee information( eno,ename, Address, BASIC, DA, HRA, TOTAL) [Hint: Use Session]
5	Write a PHP script to check how many times the web page access.[ Use cookies]
6	Write a PHP script to change the preference of your web page like font style, font, size, font color, background color using cookie. Display selected settings on next page and actual implementation (with new settings) on third page.
<b>Sr.No.</b>	<b>Practical Assignment : Set-VII (Databases (MySQL))</b>
1.	<p>Consider the following entities and their relationship.</p> <p>Doctor ( doc_no, dname, address, city, area) Hospital (hosp_no, hname, hcity)</p>

	Doctor-Hospital related with many-one relationship. Create a RDB in 3NF for above and solve the following. Using above database write a script in PHP to print the Doctor visiting to the hospital in tabular format. Accept hospital name from user[ Use MySQL]						
2	Consider the following entities and their relationship. Student ( stud_id, name, class) Competition(c_no,c_name, type) a) Relationship between student and competition In many-many with attributes rank and year. b) Create a RDB in 3NF for above and solve the following. c) Using above database write a script in PHP to accept a competition from user and display information of student who has secured 1st rank in that competition.						
3	Consider the following entities and their relationship Emp( e_no, ename, address, phone, salary) Dept(d_no, dname, location) Emp-Dept related with many-one relationship. Create a RDB in 3NF for above and solve the following.  Using above database write a script in PHP which will a) Insert Employee records and Department records into respective tables. b) Print a salary statement in the format given below, for a given Department. [Hint : create a HTML form to accept Department name form user] <table><tr><td>Maximum Salary</td><td>Minimum Salary</td><td>Sum salary</td></tr><tr><td></td><td></td><td></td></tr></table>	Maximum Salary	Minimum Salary	Sum salary			
Maximum Salary	Minimum Salary	Sum salary					
Sr.No.	Practical Assignment : Set VI (JavaScript)						
1	Write the JavaScript to convert temperature from Celsius to Fahrenheit.						
2	Write the JavaScript to calculate sum of 5 subjects and find percentage						
3	Write the JavaScript to calculate simple interest.						
4	Write the JavaScript to do swapping of two values. ( For example : if A=100 and B=200 , after swapping it becomes A=200 and B=100)						
5	Write the JavaScript to take input as student's age and check whether given student can be eligible for driving a bike or not						
6	Write the JavaScript to check whether a given year is leap year or not.						
7	Write the JavaScript to WAP to print grade of a student using If Else Ladder Statement						
8	Write the JavaScript to take marks of five subjects. Display total marks and percentage. With the help of percentage print grade of a student using switch case						
9	Write the JavaScript to accept the week day as number from user and display Monday to Sunday.						
10	Write the JavaScript to print table of first n numbers in proper format.						
11	Write the JavaScript to check whether a given number is perfect number or not.						
12	Write the JavaScript to WAP to check whether a given number is prime number						
13	Write the JavaScript to print first n perfect numbers and prime numbers						
14	Write the JavaScript to check whether a given number is armstrong number or not.						
Sr.No.	Practical Assignment : Set-VIII (XML and AJAX)						
1.	Write a script to create XML file as 'Employee.xml'. The element of this xml file are as follows: <Empdetails> <Employee EMPNo= Empname=>						

	<pre> &lt;Salary&gt;-----&lt;/Salary&gt; &lt;Designation&gt;-----&lt;/Designation&gt; &lt;/Employee&gt; &lt;/Empdetails&gt; </pre>
2.	<p>Write a PHP script to generate an XML in the following format in php.</p> <pre> &lt;? Xml version='1.0'encoding='ISO-8859-1'?&gt; &lt;Book Store&gt; &lt;Books&gt; &lt;PHP&gt; &lt;Title&gt; Programming in PHP &lt;/ Title&gt; &lt;Publication&gt;O'RELLY&lt;Publication&gt; &lt;/PHP&gt; &lt;PHP&gt; &lt;Title&gt; Beginners PHP&lt;/ Title&gt; &lt;Publication&gt; WORX&lt;/Publication&gt; &lt;/PHP&gt;&lt;/Books&gt; &lt;/Book Store&gt; </pre>
3	<p>Write a script to create XML file 'University.xml'. The element details of 'University.xml' Are as follows:</p> <pre> &lt;Univ&gt; &lt;Uname&gt;-----&lt;/Uname&gt; &lt;CITY&gt;-----&lt;/CITY&gt; &lt;Rank&gt;-----&lt;/Rank&gt; &lt;/Univ&gt; </pre> <p>a) Store the details of at least 3 universities.  b) Link the 'University.xml' file to CSS and get well formatted output as given below.</p> <p>i) Uname :  Color : black;  Font-family: copperplate G0thic Light;  Font size: 16pt;  Font:Bold;</p> <p>ii) City and Rank  Color: Yellow;  Font-family: Arial;  Font-size : 12pt;  Font: Bold;</p>
4	<p>Write a PHP Script to read 'BOOK.xml' file and print specific content of a file using DOMDocument parser. 'Book.xml' file should contain following information with at least 5 records with values.</p> <p>BookInfo  Book NO, Book Name, Author Name, Price, Year.  [Note: Examiners can change the Book info file to Student info, Teacher info]</p>
5	<p>Write a AJAX program to read contact. Dat file and print the contain of a file in a Tabular form when the user clicks on print button.</p> <p>Contact.dat file contain srno, name, residence number, mobile number, context/ relation.</p> <p>[ Enter at least 3 record in contact.dat file]  [Note: Examiner may change the contact. dat, dept.dat and provide proper structure of the file]</p>
6	<p>Write AJAX program to print movie by selecting an actor's name. create table Movie and Actor with 1:M cardinality as follows:</p> <p>Movie ( mno, mname, release_year)</p>

	Actor( ano, aname) [USE MySQL]
7	Write a AJAX program to search Student name according to the character typed and display list using array
8	Write a AJAX program to print Teacher information from MySQL table Teacher. Teacher (Tno, Name, Subject, Research area). [Note: Examiner can change MySQL table]

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 555 MJP: Lab course Based on CA 552 MJ**

<b>Teaching Scheme:</b>	<b>Credits</b>	<b>Examination Scheme:</b>
<b>Practical:04Hours/Week</b>	<b>02</b>	<b>Continuous Evaluation: 15 Marks</b>
		<b>End-Semester : 35 Marks</b>

- 1) Write a R program to take input from the user (name and age) and display the values. Also print the version of R installation.
- 2) Write a R program to create a sequence of numbers from 20 to 50 and find the mean of numbers from 20 to 60 and sum of numbers from 51 to 91.
- 3) Write a R program to create a simple bar plot of five subjects marks.
- 4) Write a R program to get the unique elements of a given string and unique numbers of vector.
- 5) Write a R program to multiply two vectors of integers type and length 3.
- 6) Write a R program to list containing a vector, a matrix and a list and give names to the elements in the list.
- 7) Write a R program to create a list containing a vector, a matrix and a list and give names to the elements in the list. Access the first and second element of the list.
- 8) Write a R program to create a list containing a vector, a matrix and a list and remove the second element.
- 9) Write a R program to merge two given lists into one list.
- 10) Write a R program to assign new names "a", "b" and "c" to the elements of a given list.
- 11) Write a R program to create an empty data frame.
- 12) Write a R program to create a data frame from four given vectors.
- 13) Write a R program to create a data frame using two given vectors and display the duplicated elements and unique rows of the said data frame.
- 14) Write a R program to save the information of a data frame in a file and display the information of the file.
- 15) Write a R program to create an ordered factor from data consisting of the names of months.
- 16) Write R program to find whether given number is positive or negative.
- 17) Write R program to read number and print corresponding day name in a week
- 18) Create a Matrix using R and Perform the operations addition, subtraction, multiplication.
- 19) Using R import the data from Excel/.CSV file and find mean, median, mode, quartiles.
- 20) Using R import the data from Excel/.CSV file and find standard deviation, variance and co-variance.
- 21) Write a R program to count the number of NA values in a data frame column.
- 22) Write a R program to call the (built-in) dataset air quality. Remove the variables 'Solar.R' and 'Wind' and display the data frame.
- 23) Write a R program to compare two data frames to find the row(s) in first

data frame that are not present in second data frame

24) Write a R program to create a factor corresponding to height of women data set, which contains height and weights for a sample of women.

25) Write a R program to find nth highest value in a given vector.

26) Write an R program to sort a Vector in ascending and descending order.

27) Write an R program to extract first 10 English letter in lower case and last 10 letters in upper case and extract letters between 22nd to 24th letters in upper case.

28) Write an R Program to calculate Decimal into binary of a given number.

29) Write an R program to convert a given matrix to a list and print list in ascending order.

30) Write an R program to create a Data frames which contain details of 5employees and display the details in ascending order.

31) Consider the inbuilt iris dataset i) Create a variable “y” and attach to it the output attribute of the “iris”dataset .ii) Create a barplot to breakdown your output attribute. iii) Create a density plot matrix for each attribute by class value.

32) Consider Weather dataset i) Selecting using the column number ii) Selecting using the column nameiii) Make a scatter plot to compare Wind speed and temperature.

33) Write a script in R to create a list of students and perform thefollowingi) Give names to the students in the list. ii) Add a student at the end of the list. iii) Remove the first Student.iv) Update the second last student.

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA 560A MJ: Advanced Java Programming**

<b>Teaching Scheme:</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b>
<b>Theory: 02 Hours/Week</b>		<b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>

**Course Objectives:**

- To learn database programming using Java
- To study web development concept using Servlet and JSP
- To develop a game application using multithreading
- To learn socket programming concept

**Course Outcomes:**

On completion of the course, student will be able to–

- To access open database through Java programs using Java Data Base Connectivity (JDBC) and develop the application.
- Understand and create dynamic web pages, using Servlets and JSP.
- Work with basics of framework to develop secure web applications

**Course Contents**

<b>Unit I</b>	<b>Database Programming</b>	<b>08 Hrs</b>
1.1 The role of jdbc, The design of jdbc 1.2 Types of drivers 1.3 Steps of jdbc to access database 1.3 Connectivity with database 1.4 Create JDBC Statements – Statement, PreparedStatement, CallableStatement 1.5 Scrollable and updatable result sets - TYPE_FORWARD_ONLY, TYPE_SCROLL_INSENSITIVE, TYPE_SCROLL_SENSITIVE - CONCUR_READ_ONLY, CONCUR_UPDATABLE 1.6 Metadata – DatabaseMetadata, ResultSetMetadata (Database : PostgreSQL)		
<b>Unit II</b>	<b>Networking</b>	<b>04 Hrs</b>
2.1 The java.net package - InetAddress, URL, URLConnection class 2.2 Connection oriented transmission – Stream Socket Class 2.3 SocketServer and Socket class 2.4 Creating a Socket to a remote host on a port (creating TCP client and server) 2.5 Simple Socket Program Example.		
<b>Unit III</b>	<b>Multithreading</b>	<b>06 Hrs</b>
3.1 Introduction to Thread 3.2 Life cycle of thread 3.3 Thread Creation <ul style="list-style-type: none"> <li>- By using Thread Class</li> <li>- By Using Runnable interface</li> </ul> 3.4 Priorities and Synchronization 3.5 Running multiple thread 3.6 Inter thread communication		
<b>Unit IV</b>	<b>Servlet</b>	<b>06 Hrs</b>
4.1 Introduction to Servlet and Hierarchy of Servlet 4.2 Life cycle of servlet 4.3 Tomcat configuration (Note: Only for Lab Demonstration) 4.4 Handling get and post request (HTTP) 4.5 Handling a data from HTML to servlet		

4.6 Retrieving a data from database to servlet

4.7 Session tracking – User Authorization, URL rewriting, Hidden form fields, Cookies and HTTP Session

<b>Unit V</b>	<b>JSP</b>	<b>04 Hrs</b>
---------------	------------	---------------

5.1 Simple first JSP program

5.2 Life cycle of JSP

5.3 Implicit Objects

5.4 Scripting elements – Declarations, Expressions, Scriptlets, Comments

5.5 JSP Directives – Page Directive, include directive

5.6 Mixing Scriptlets and HTML

5.7 Example of forwarding contents from database to servlet, servlet to JSP and displaying it using JSP scriptlet tag

<b>Unit VI</b>	<b>Introduction to Frameworks</b>	<b>02 Hrs</b>
----------------	-----------------------------------	---------------

6.1 Spring

6.1.1 Introduction of Spring framework, Bean

6.1.2 Spring Applications

6.1.3 Spring – MVC framework

6.2 Introduction to Components of Hibernate

6.3 Introduction to Struts and framework

6.4 Introduction to Maven framework, MOJO, POJO

<b>Teaching Scheme:</b>	<b>Credits 02</b>	<b>Examination Scheme:</b>
<b>Practical:02 Hours/Week</b>		<b>Continuous Evaluation: 15 Marks</b> <b>End-Semester : 35 Marks</b>

<b>Unit I</b>	<b>Database Programming</b>	
<ol style="list-style-type: none"> <li>1. Write a JDBC program to display all the details of the Person table in proper format on the screen. Create a Person table with fields as PID, name, gender, birth_year in PostgreSQL. Insert values in Person table.</li> <li>2. Write a program to display information about the ResultSet like number of columns available in the ResultSet and SQL type of the column. Use Person table. (Use ResultSetMetaData).</li> <li>3. Write a JDBC program to display all the countries located in West Region. Create a table Country in PostgreSQL with fields (Name, continent, Capital,Region). Insert values in the table.</li> <li>4. Write a JDBC program to insert the records into the table Employee(ID,name,salary) using PreparedStatement interface. Accept details of Employees from user.</li> <li>5. Write a JDBC program to perform search operation on Person table. <ol style="list-style-type: none"> <li>1. Search all the person born in the year 1986.</li> <li>2. Search all the females born between 2000- 2005.</li> </ol> </li> <li>6. Write a JDBC program to update number_of_students of "BCA Science" to 1000.Create a table Course (Code,name, department,number_of_students). Insert values in the table.</li> <li>7. 3. Write a menu driven program to perform the following operations on District(Name, area,population) table. <ol style="list-style-type: none"> <li>1. Insert</li> <li>2. Modify</li> <li>3. Delete</li> <li>4. Search</li> <li>5. View All</li> <li>6. Exit</li> </ol> </li> </ol>		
<b>Unit II</b>	<b>Networking</b>	
<ol style="list-style-type: none"> <li>1. Write a client-server program which displays the server machine's date and time on the client machine.</li> <li>2. Write a program to find primary IP address of the host name which you passed as a parameter</li> <li>3. Write a program which sends the name of a text file from the client to server and displays the contents of the file on the client machine. If the file is not found, display an error message.</li> <li>4. Write a program to accept a list of file names on the client machine and check how many exist on the server. Display appropriate messages on the client side.</li> <li>5. Write a server program which echoes messages sent by the client. The process continues till the client types "END".</li> <li>6. Write a program for a simple GUI based chat application between client and server.The</li> </ol>		
<b>Unit III</b>	<b>Multithreading</b>	

1. Write a multithreading program in java to display all the vowels from a given String.
2. Write a multithreading program using Runnable interface to blink Text on the frame.
3. Write a program that create 2 threads – each displaying a message (Pass the message as a parameter to the constructor). The threads should display the messages continuously till the user presses ctrl-c. Also display the thread information as it is running.
4. Write a java program to calculate the sum and average of an array of 1000 integers (generated randomly) using 10 threads. Each thread calculates the sum of 100 integers. Use these values to calculate average. [Use join method ]
5. Define a thread called “PrintText\_Thread” for printing text on command prompt for n number of times. Create three threads and run them. Pass the text and n as parameters to the thread constructor. Example:
  - i. First thread prints “I am in FY” 10 times
  - ii. Second thread prints “I am in SY” 20 times
  - iii. Third thread prints “I am in TY” 30 times
6. Write a program to simulate traffic signal using threads
7. Write a program in which thread sleep for 6 sec in the loop in reverse order from 100 to 1 and change the name of thread.
8. Write a program to solve producer consumer problem in which a producer produces a value and consumer consume the value before producer generate the next value. (Hint: use thread synchronization)

<b>Unit IV</b>	<b>Servlet</b>	
----------------	----------------	--

1. Write a servlet program to display current date and time of server.
2. Design a servlet to display “Welcome IP address of client” to first time visitor. Display Welcome-back IP address of client” if the user is revisiting the page. (Use Cookies)  
(Hint: Use req.getRemoteAddr() to get IP address of client)
3. Design the table User (username, password) using Postgre Database. Design HTML login screen. Accept the user name and password from the user. Write a servlet program to accept the login name and password and validates it from the database you have created. If it is correct then display Welcome.html otherwise display Error.html.
4. Design a servlet that provides information about a HTTP request from a client, such as IP address and browser type. The servlet also provides information about the server on which the servlet is running, such as the operating system type, and the names of currently loaded servlets.
5. Write a servlet which counts how many times a user has visited a web page. If the user is visiting the page for the first time, display a welcome message. If the user is re-visiting the page, display the number of times visited. (Use cookies).
6. Write a program to create a shopping mall. User must be allowed to do purchase from two pages. Each page should have a page total. The third page should display a bill, which consists of a page total of whatever the purchase has been done and print the total. (Use HttpSession)

<b>Unit V</b>	<b>JSP</b>	
---------------	------------	--

1. Write a Program to make use of following JSP implicit objects:
  - i. out: To display current Date and Time.
  - ii. request: To get header information.
  - iii. response: To Add Cookie
  - iv. config: get the parameters value defined in
  - v. application: get the parameter value defined in
  - vi. session: Display Current Session ID
  - vii. pageContext: To set and get the attributes.
  - viii. page: get the name of Generated Servlet

2. Create a JSP page which will accept the file extension and display all files in the current directory having that extension. Each filename should appear as a hyperlink on screen.
3. Create a JSP page to accept a number from a user and display it in words:  
Example: 123 – One Two Three.
4. Write a JSP program to perform Arithmetic operations such as Addition, Subtraction, Multiplication and Division. Design a HTML to accept two numbers in text box and radio buttons to display operations. On submit display result as per the selected operation on next page using JSP.
5. Create a JSP page, which accepts user name in a text box and greets the user according to the time on server side.  
Example: If user name is Admin  
Output:  
If it is morning then display message in red color as,  
Good morning, Admin  
Today's date: dd/mm/yyyy format  
Current time: hh:mm:ss format  
If it is afternoon then display message in green color as,  
Good afternoon, Admin  
Today's date: dd/mm/yyyy format  
Current time: hh:mm:ss format  
If it is evening then display message in blue color as,  
Good evening, Admin  
Today's date: dd/mm/yyyy format  
Current time: hh:mm:ss format  
(Hint: To display date and time use GregorianCalendar and Calendar class)
6. Write a JSP program to display number of times user has visited the page. (Use cookies)

<b>Teaching Scheme:</b>	<b>Credits</b> <b>02</b>	<b>Examination Scheme:</b>
<b>Theory: 02 Hours/Week</b>		<b>Continuous Evaluation: 15 Marks</b> <b>End-Semester :35 Marks</b>

**Course Objectives:**

- To understand development of windows application
- To learn data access mechanism.
- Create a web application
- Understand MVC Framework

**Course Outcomes:**

On completion of the course, student will be able to–

- Understand the VB.NET, C# and ASP
- Design and develop window based and web based .NET applications.
- Design and Implement database connectivity using ADO.NET .

**Course Contents**

<b>Unit I</b>	<b>Introduction to VB .NET</b>	<b>08 Hrs</b>
1.1 Basics of VB.Net 1.1.1 Operators 1.1.2 Data Types 1.1.3 Control Structures 2.2 Build Windows Applications 2.2.1 Controls: Form, TextBox, Button, Label, CheckBox, ListBox, ComboBox, RadioButton, DateTimePicker, MonthCalender, Timer, Progressbar, Scrollbar, PictureBox, ImageBox, ImageList, TreeView, ListView, Toolbar, StatusBar, Datagridview 2.2.2 Menus and PopUp Menu 2.2.3 Predefined Dialog controls: Color, Save, File, Open, Font 2.2.4 DialogBox - InputBox(), MessageBox, MsgBox()		
<b>Unit II</b>	<b>Introduction to C#</b>	<b>07 Hrs</b>
2.1. Language Fundamentals 2.1.1 Data type and Control Constructs 2.1.2 Value and Reference Types, Boxing 2.1.3 Arrays 2.1.4 String 2.1.5 Functions 2.2. Object Oriented Concepts 2.1.1 Defining classes and Objects 2.1.2 Access modifiers 2.1.3 Constructors 2.1.4 Inheritance 2.1.5 Interface 2.1.6 Abstract Class 2.1.7 Method Overloading and Overriding		

<b>Unit III</b>	<b>ASP .NET</b>	<b>08 Hrs</b>
3.1What isASP.NET? 3.2Architecture ofASP.NET 3.3Forms, WebPages, HTML forms 3.4Request & Response in Non-ASP.NET pages 3.5Using ASP.NET Server Controls 3.6Overview of Control structures 3.7Functions 3.8Introduction to Web forms 3.8.1 Web Controls 3.8.2 Server Controls 3.8.3 Client Controls 3.8.4 Navigation Controls 3.8.5 Validations 3.8.6 Master Page		
<b>Unit IV</b>	<b>ADO .NET and MVC</b>	<b>07 Hrs</b>

**CA 563B MJP: Lab Course based on CA 562B MJ**

**Teaching Scheme:**  
**Theory: 04**  
**Hours/Week**

**Credits 02**

**Examination Scheme:**  
**IE: 15 Marks**  
**UE: 35 Marks**

Sample C#.NET Assignments:

1. Write a program to check whether the number is even or odd, print out an appropriate message to the user.
2. Write a program which will find all such numbers which are divisible by 5.
3. Write a program which can compute the factorial of a given numbers.
4. Write a program that prints out all the elements of the list that are less than 10.
5. Write a program to determine whether the number is prime or not.
6. Write a program to check whether a number is palindrome or not. (using recursion and without recursion).
7. Write a C# program that reads a number from the user and calculates its square root. Handle the exception if the number is negative.
8. Write a C# program that prompts the user to input two numbers and divides them. Handle an exception when the user enters non-numeric values.
9. Write a C# Sharp program that takes three letters and displays them in reverse order.
10. Write a C# Sharp program that takes a character as input and checks if it is a vowel, a digit, or any other symbol.
11. Write a C# Sharp program to accept a person's height in centimeters and categorize them according to their height.
12. Write a C# Sharp program to read roll no, name and marks of three subjects and calculate the total, percentage and division.
13. Write a program in C# Sharp which is a menu-driven program to perform simple calculations.
14. Write a program in C# Sharp to create a function to input a string and count the number of spaces within the string.
15. Write a program in C# Sharp to calculate the sum of elements in an array.
16. Write a program in C# Sharp to create a recursive function to find the factorial of a given number.
17. How to interact with the user, with the Request.QueryString command.
18. Write a program to interact with the user, with the Request.Form command.
19. Write a program to interact with the user, through radio buttons, with the Request.Form command.
20. Write a program to create an open connection to a data source using the ADOConnection object. Through this connection, you can access and manipulate a database.

**Savitribai Phule Pune University**  
**First Year of Master of Computer Applications (2023 Course)**

**CA581 OJT/FP: Industry Internship / Field Project (FP)**

**Credits**  
**04**

**Examination Scheme:**  
**Continuous Evaluation: 30 Marks**  
**End-Semester : 70 Marks**

**Course Objectives**

- To provide students with an experience in working on projects or working within industry
- To inculcate Problem solving skills and work culture of the industry
- To foster team spirit
